

Hospital Patient Relations, ADA Coordinators and Risk Management Personnel

We can resolve your interpreting issues for Deaf and Hard of Hearing patients who use ASL!

If your job involves ensuring that your patients have interpreter services, chances are you have experienced frustration trying to find a way to serve your Deaf and Hard of Hearing patients who use American Sign Language. We can help!

The **ADA** , **HIPAA**  and **JCAHO**  requirements all nip at your heels, requiring you to provide clear communication access with no regard to what resources are actually available in your community. At the same time there is a severe nationwide interpreter shortage, which has caused increasing wait times, sometimes several hours or more. If you are a rural hospital, perhaps you have faced the inability to find ANY qualified interpreters to meet your needs. In addition, costs are skyrocketing as demand increases. **Deaf Link** can help.

We are offering a free webinar on using **Deaf Link's Video Remote Interpreting** solution to satisfy your interpreting needs! The webinar will take only 15-30 minutes of your time, no obligation, just some good information.

We do webinars on a weekly basis. Call or email to find out the dates and times of our next webinars.

RSVP to Kari@deaflink.com and we will send you another email that includes the webinar link and other information to be able to participate in the webinar. If those times don't work for you contact us and we will set up a special time for you.
